Art Unit: 1616

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Husbands et al (US 4,761,501) in view of Theeuwes (US 4,111,201).

Husbands et al teach substituted phenylacetamides such as venlafaxine as antidepressants (column 8, lines 22-27). Delivery by "any of the usual dosage forms, including tablets and capsules" is disclosed (column 10, lines 35-37).

However, Husbands does not teach the claimed dosage form.

Theeuwes teaches an osmotic device for delivery of an agent at a controlled rate comprising an agent, a compartment, a semipermeable wall, a passageway and a member which increases in volume, whereby the agent is released (abstract). Antidepressants are specified (column 2 line 22). Delivery of highly soluble agents is disclosed (column 2 lines 6-11). Tablet shaped devices are specified (column 20 line 55). Polyoxyalkylene ethers and hydroxyethyl cellulose are disclosed as suspending agents for the active (column 12 lines 7-30).

It would have been obvious to one of ordinary skill to deliver the antidepressant of Husbands et al in the vehicle of Theeuwes to achieve the beneficial effect of delivery at a controlled rate. As to the now claimed sustained

Art Unit: 1616

release, Theeuwes teaches delivery over 15 hours (see figures), which constitutes the same period of time applicants disclose in examples 1 and 3 of the specification.

No claims allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
